EXPLANATORY NOTES

This bulletin contains results of a survey of weekly earnings of adult male employees conducted for the pay-period which included 12 May 1971. Preliminary results of this survey were published in a statistical bulletin (Reference No. 6.29) on 5 November 1971. A copy of the basic form used in the survey is shown on page 8.

2. The survey was conducted by means of stratified random samples of (i) private employers subject to pay-roll tax (that is those, other than exempt employers, paying more than \$400 a week in wages and salaries), (ii) public hospitals, and (iii) local government authorities; and in addition a complete coverage of (iv) Commonwealth and State government departments, government authorities and semi-government bodies. In the published results "private employees" refer to those covered by categories (i) and (ii) and "government employees" refer to those covered by categories (iii) and (iv).

3. The object of the survey was to obtain estimates of the numbers and proportions of full-time adult male employees (paid for a full week) in various total weekly earnings groups, average weekly total earnings for these employees, and a dissection of average weekly total earnings into average weekly overtime earnings and average weekly ordinary time earnings. Separate details were obtained for (a) male managerial, executive, professional and higher supervisory staff, and (b) other full-time adult male employees. Similar statistics were last obtained from a survey of weekly earnings in October 1965 but that survey did not have as wide an industry scope as this current survey. The detailed results of the October 1965 survey were published in Labour Report No. 52, 1965-66. The current survey excludes employees of private employers not subject to pay-roll tax; employees in rural industry and private domestic service; employees of religious, benevolent and other similar organisations exempt from pay-roll tax (other than public hospitals and government institutions); and waterside workers employed on a casual basis.

4. Because this survey was confined to full-time adult male employees paid for a full working week, and for other reasons, the average weekly earnings for private employees shown in this bulletin are not directly comparable with the average earnings for full-time adult males obtained from the annual October surveys of weekly earnings and hours.

5. The results in this bulletin are based on returns from a sample of 4,995 private employers, returns from public hospitals, and returns from government employers. These results are representative of 2,212,600 full-time adult male employees made up of 1,500,600 full-time adult males in private employment and 712,000 in government employment.

6. The estimates of private and government employees do not correspond to the estimates of total male civilian employment in the specified industry groups published by this Bureau. This is mainly because the sample of private employers was restricted to those subject to pay-roll tax and these employers were generally classified to the industry group of their major activity, and because the information obtained in the survey related to full-time adult male employees (as defined).

7. The estimates are shown for full-time adult males classified by industry groups and by States, and distinguishing government and private employment. They reflect the effects of differences - both as between States and as between government and private employment - in amounts paid for the various occupations, in amounts paid for the same occupation, in occupational structure within industries, and in industry structure.

8. Because the number of government employees reported in some industry groups is small the number of these employees in various weekly earnings groups has not been shown in the same industry detail as for private employees. Also in the case of both government and private employees, where standard error percentages (see paragraphs 13 to 20) are relatively high, the numbers in certain weekly earnings groups have not been published separately but have been amalgamated with employees in other earnings groups. In such cases it may be possible to derive from published details estimates for figures not published or amalgamated with other figures. However figures so derived should not be regarded as reliable.

9. Employers (private and government) were asked to give reasons for low earnings of any full-time adult male employees included in specified lower weekly earnings groups. These groups, which varied from State to State, were established after considering the rates of minimum wage for adult males. The earnings groups selected for each State were as follows: up to \$45.99 a week in New South Wales, Victoria, Queensland and the Australian Capital Territory; up to \$44.99 a week in South Australia; up to \$48.99 a week in Western Australia; up to \$46.99 a week in Tasmania; and up to \$47.99 a week in the Northern Territory. From comments made by respondents it was possible to omit from these lower weekly earnings groups any adult males incorrectly included because they were not paid for a full week. Those males in these earnings groups who were confirmed as full-time adult males being paid for a full week were estimated to represent approximately 2,600 adult male employees. They were reported as being: (i) males paid for normal weekly hours of 30 or more (survey definition of full-time) but less than standard weekly hours (49.3 per cent); (ii) males paid according to award etc. provisions, males not subject to awards, and males receiving board and lodging, etc. (29.6 per cent); (iii) males paid by commission (3.4 per cent); (iv) trainees, cadets, etc. (7.1 per cent); (v) handicapped, slow workers, pensioners, etc. (8.3 per cent); and (vi) other males (2.3 per cent). There may have been some adult males incorrectly shown in the higher weekly earnings groups who were not paid for a full week. It was not possible to ensure that all such employees were omitted from the survey results.

10. On the survey forms the categories "Managerial, executive, professional and higher supervisory staff" and "All other full-time employees" were defined as set out in paragraph 25 below. In the case of private employers the allocation of employees between these categories depended on the judgment of the individual employers completing the returns. In the case of government employers "managerial etc. staff" were generally defined as - (i) those employees who did not receive payment for overtime, and (ii) those employees who, although subject to payment for overtime, were in charge of a significant number of employees in a separate establishment (or establishments). Thus the concept of full-time adult male managerial etc. staff and other employees may differ between the private and government sectors of the survey and this may affect the relative level of the estimates for these categories of employees in the two sectors.

11. The classification of weekly earnings groups specified in the survey for managerial etc. staff differed from that specified for non-managerial employees (see copy of basic survey form on page 8). Separate details are presented for the earnings groups specified for non-managerial employees and for the earnings groups specified for managerial etc. staff. Some tables present a combination of the two classifications of employees according to abridged earnings groups. In this combination the managerial etc. staff shown as earning "up to \$79.99" have been included in the "\$75.00 to \$79.99" group. Thus the figures for all earnings groups below \$80 in tables for a combination of the two classifications of employees are subject to some distortion.

12. It is known that some private employees in the Northern Territory and the Australian Capital Territory are included on pay-roll tax returns for some of the States. Thus these employees would not have been included in the survey estimates of private employees in the two territories. Therefore, the survey estimates shown for private employees, and for combinations of private and government employees, in the Northern Territory and the Australian Capital Territory differ from the estimates that would have been obtained if all relevant employees in the territories had been recorded separately.

STANDARD ERRORS OF ESTIMATES

General

13. As the private sector and local government sector of the survey were surveyed by means of samples, the estimates in the tables of this bulletin are subject to sampling variability, that is, variations which occur by chance because only samples of employers were surveyed. The extent of the detail published has been determined after considering estimated measures of sampling variability. The estimates that have been obtained from this survey may differ from figures that would have been obtained from a complete census of all employers. One measure of the likely difference is given by the standard error of the estimates. There are about two chances in three that a sample estimate will differ by less than one standard error from the results which would be obtained from a comparable complete collection; and about nineteen chances in twenty that the difference will be less than two standard errors. For example, with an estimate of 10,000 non-managerial etc. staff in total weekly earnings groups for private employees, which according to the table in paragraph 16 has a standard error of 5 per cent (or 500), there are two chances in three that a complete collection would give a figure within the range 9,500 to 10,500 and nineteen chances in twenty that the figure would be within the range 9,000 to 11,000.

14. The standard errors are themselves based on the survey results and consequently are also subject to sampling variability. The figures do not give a precise measure but an indication of the standard error of any particular estimate obtained from the survey.

15. The following paragraphs set out the level of standard errors for the various statistics obtained from the survey results. Particular reference is made to the standard errors that relate to the private sector of the survey. Figures relating to the government sector of the survey which was in large part completely enumerated (excluding local government authorities which were sampled) are either not subject to sampling variability or are subject to smaller standard errors than estimated for the private sector. Further, the standard errors for total (private and government) employees are generally lower than those for the private sector.

Numbers in total weekly earnings groups

16. Approximate standard errors for the estimated numbers of managerial etc. staff and of non-managerial employees in total weekly earnings groups in the private sector in Australia are shown in the following table. Standard errors for other groups of employees would approximate to the figures shown in this table. Those for employees in the government sector, in the private and government sectors combined, and in particular industry groups in each State and Australia would generally be lower than those shown; those for employees in all industry groups in any State would be higher. Standard errors for the estimated total number of employees (that is, managerial etc. staff and other employees) in total weekly earnings groups are not available but would generally be of the same order as those shown for non-managerial employees. In general, estimates of the numbers of employees in particular weekly earnings groups are not shown separately if the standard error of the estimate is over 20 per cent. In such cases the figures have generally been combined with those for other earnings groups in the same table.

APPROXIMATE STANDARD ERRORS FOR ESTIMATES OF THE
NUMBER OF EMPLOYEES IN TOTAL WEEKLY EARNINGS GROUPS
PRIVATE EMPLOYEES, ALL INDUSTRY GROUPS, AUSTRALIA

| ESTIMATED NUMBER IN TOTAL WEEKLY EARNINGS GROUPS | APPROXIMATE STANDARD ERRORS OF ESTIMATES | | | |
|---|--|---------------------------|-------------------------------------|---------------------------|
| | Managerial etc. staff | | Other than managerial etc. staff | |
| | Number | Percentage of estimate | Number | Percentage of estimate |
| 1,000 | 100 | 10 | 190 | 19 |
| 2,000 | 120 | 6 | 240 | 12 |
| 5,000 | 250 | 5 | 400 | 8 |
| 10,000 | 300 | 3 | 500 | 5 |
| 20,000 | 600 | 3 | 800 | 4 |
| 50,000 | 1,000 | 2 | 1,000 | 2 |
| 100,000 | 2,000 | 2 | 2,000 | 2 |
| 200,000 | 2,000 | 1 | 2,000 | 1 |

Average weekly earnings

17. In determining the extent of detail of average weekly earnings published in Tables 17, 18 and 19 approximate percentage standard errors were considered. In general, figures of average weekly earnings are not shown in these tables where the standard errors are above approximately 5 per cent for earnings of managerial etc. staff; above approximately 15 per cent for overtime earnings for other than managerial etc. staff; and above approximately 5 per cent for both average weekly ordinary time and average weekly total earnings for other than managerial etc. staff. Where because of these limits overtime earnings have had to be omitted from Tables 18 and 19, the corresponding figures for average weekly ordinary time earnings have also been omitted.

18. Standard error percentages of average weekly earnings for managerial etc. staff and for other employees in each State and in certain industry groups for Australia are shown in Tables 20 to 25 on pages 49 to 54.

Medians, Quartiles and Deciles

19. Approximate percentage standard errors of the medians, quartiles and deciles (see paragraphs 29 to 32 for definitions of these values) shown in Tables 20 to 25 on pages 49 to 54 can be derived from the percentage standard error of the relevant mean (i.e. average weekly earnings) using the following approximations.

RELATIONSHIPS OF PERCENTAGE STANDARD ERRORS

| Mean | Median | Quartile | Decile |
|------|--------|----------|--------|
| 0.5% | 0.6% | 0.7% | 0.9% |
| 1.0% | 1.3% | 1.4% | 1.7% |
| 2.0% | 2.5% | 2.7% | 3.4% |
| 3.0% | 3.8% | 4.1% | 5.1% |
| 4.0% | 5.0% | 5.4% | 6.8% |

20. The estimates of average weekly earnings shown in this bulletin have been rounded to the nearest 10 cents. The estimated numbers of employees in the various weekly earnings groups have been rounded to the nearest hundred. For these reasons, the sums of components in the tables may not add to the totals shown.

DEFINITIONS

21. The following definitions which include those set out on the survey forms, refer to terms used in tables of this bulletin.

22. ADULT MALES include all male employees 21 years of age and over and those male employees who, although under 21 years of age, were paid at the adult male rate for their occupation. All other male employees under 21 years of age are excluded.

23. NUMBER OF ADULT MALE EMPLOYEES refers to all adult male employees (as defined above) who received pay for the pay-period which included 12 May 1971.

24. FULL-TIME ADULT MALE EMPLOYEES are those adult male employees whose normal hours of work were 30 or more a week and who were paid for their full normal hours of work for the pay-period which included 12 May 1971. Included are full-time adult male employees on paid annual leave, paid sick leave, long service leave and paid holidays taken during the specified pay-period if they received pay for their full normal hours of work. Excluded are "full-time" adult male employees on short-time; "full-time" adult male employees who began or ceased work during the pay-period; and all adult male employees absent without pay (for any reason) during the pay-period.

25. Full-time adult males were classified according to whether they were MANAGERIAL, EXECUTIVE, PROFESSIONAL AND HIGHER SUPERVISORY STAFF (who were not further defined) or ALL OTHER FULL-TIME ADULT MALE EMPLOYEES (i.e. other than managerial etc. staff). The non-managerial employees include full-time adult male minor supervisory employees, leading hands, clerical and office staff as well as ordinary wages employees.

26. PRIVATE EMPLOYEES are employees of private employers subject to pay-roll tax and employees of all public hospitals. GOVERNMENT EMPLOYEES are civilian employees of Commonwealth and State government departments, government authorities and semi-government bodies, and of local government authorities.

27. TOTAL GROSS WEEKLY EARNINGS refers to gross earnings of adult male employees before taxation and other deductions have been made, for the pay-period which included 12 May 1971. Included are overtime earnings, ordinary time earnings, shift allowances, penalty rates, commission and similar payments; and that part of paid annual leave, paid sick leave, long service leave and paid holidays taken during the specified pay-period. Included are one week's proportion of payments made other than on a weekly basis, e.g. salary paid fortnightly or monthly; paid annual and other leave taken during the specified pay-period, periodical payments under incentive, piecework, profit-sharing schemes, etc; commissions; annual or periodical bonuses, etc. Excluded are any retrospective payments.

28. Total gross weekly earnings for ALL OTHER FULL-TIME ADULT MALE EMPLOYEES (i.e. other than managerial, executive, etc. staff) are dissected into overtime earnings and ordinary time earnings.

- (a) OVERTIME EARNINGS refers to that part of total gross weekly earnings (as defined above) for man-hours paid for in excess of award, standard or agreed hours of work. (The figures of average overtime earnings shown in Tables 17 to 19 are not average overtime earnings of only those employees who worked overtime, but are averages for all employees in the specified category whether or not they worked overtime.)
- (b) ORDINARY TIME EARNINGS refers to that part of total gross weekly earnings (as defined above) for award, standard or agreed hours of work. Included in relation to these hours are shift allowances, penalty rates, commissions, bonuses and incentive payments, and payments for annual and other leave taken during the specified week.

Details of numbers of full-time adult male employees in various earnings groups were obtained only in relation to total weekly earnings (i.e. including overtime earnings).

Medians, Quartiles and Deciles

29. The median, quartile and decile earnings shown in Tables 20 to 25 (pages 49 to 54) provide a compact method of presenting distributions of employees according to total gross weekly earnings, and are particularly useful for comparing one distribution with another. These values are defined as follows.

30. There are three quartiles which divide a cumulative distribution into four equal parts. The lower quartile shown in this bulletin, is an estimate of total gross weekly earnings such that twenty-five per cent of the employees have earnings below it. The median is an estimate of total gross weekly earnings such that fifty per cent of the employees have earnings below it and fifty per cent of the employees have earnings above it. The upper quartile is an estimate of total gross weekly earnings such that twenty-five per cent of the employees have earnings which exceed it.

31. There are nine deciles which divide a cumulative distribution into ten equal parts. The lowest decile shown in this bulletin is an estimate of total gross weekly earnings such that ten per cent of the employees have earnings below it. The highest decile is an estimate of total gross weekly earnings such that ten per cent of the employees have earnings which exceed it. It follows that eighty per cent of the employees have total gross weekly earnings which fall between the highest and lowest deciles.

32. The values of the estimates of medians, quartiles and deciles are based on the assumption that for total weekly earnings groups in which the medians, quartiles and deciles fall, employees are evenly distributed in those groups.

8.
COPY OF BASIC SURVEY FORM

SURVEY OF WEEKLY EARNINGS, ADULT MALE EMPLOYEES, MAY 1971

(STATE)

PART 1 – NUMBER OF ADULT MALES AND GROSS WEEKLY EARNINGS

| Adult males who received pay for the pay-period which includes 12 May 1971 <i>(see instructions)</i> | Number of adult males <i>(see instructions)</i> | TOTAL GROSS WEEKLY EARNINGS pay-period including 12 May 1971 (i.e. weekly total for all employees in each category) | | |
|--|--|--|--|---|
| | | Overtime earnings <i>(see instructions)</i> | Ordinary time earnings <i>(see instructions)</i> | Total earnings <i>(see instructions)</i> |
| FULL-TIME ADULT MALES i.e. those paid for their full normal weekly hours of 30 or more. <i>(see instructions)</i> | 1 Should equal item 24 below | | Total gross weekly earnings only, should be reported for managerial etc. staff | 7 Total \$ |
| (i) <i>Managerial, executive, professional and higher supervisory staff</i> | | 5 Overtime \$ | 6 Ordinary Time \$ | 8 \$ |
| (ii) <i>All other full-time adult male employees</i> (include full-time minor supervisory employees, leading hands, clerical and office staff as well as ordinary wages employees) | 2 Should equal item 46 below | | | 9 \$ |
| OTHER ADULT MALES i.e. those with normal weekly hours of less than 30; and those not paid for their full normal hours. <i>(see instructions)</i> | 3 | | Total gross weekly earnings only, should be reported for these categories | 10 \$ |
| TOTAL ADULT MALE EMPLOYEES | 4 | | | |

PART 2 – FULL-TIME ADULT MALES IN TOTAL GROSS WEEKLY EARNINGS GROUPS

| MANAGERIAL, EXECUTIVE, PROFESSIONAL AND HIGHER SUPERVISORY STAFF paid for their full normal weekly hours of 30 or more. <i>(see instructions)</i> | Number in each earnings group | ALL OTHER FULL-TIME ADULT MALE EMPLOYEES paid for their full normal weekly hours of 30 or more <i>(see instructions)</i> | Number in each earnings group |
|---|---------------------------------|---|-------------------------------|
| Total Gross Weekly Earnings Groups pay-period including 12 May 1971 | | Total Gross Weekly Earnings Groups pay-period including 12 May 1971 | |
| | No. | | No. |
| Up to \$ 79.99 | 11 | Up to \$ 43.99 | 25 |
| \$ 80.00 to 99.99 | 12 | \$ 44.00 to 44.99 | 26 |
| \$100.00 to 119.99 | 13 | \$ 45.00 to 45.99 | 27 |
| \$120.00 to 139.99 | 14 | \$ 46.00 to 46.99 | 28 |

| Australia | 134.40 | 13.40 | 74.40 | 87.80 | 95.50 | 176.90 | 6.70 | 84.40 | 91.00 | 98.90 | 143.20 | 11.10 | 77.80 | 88.90 | 96.60 | | | |

(a) Pay-period which included 12 May 1971. (b) See paragraph 10, page 3. (c) Averages for all employees represented in the survey - see paragraph 28, page 6. (d) Includes N.T. and ACT for which separate details for manufacturing groups are not available. (e) Information not available because the figures are subject to sampling variability too high for most practical uses (see paragraph 17, page 5). (f) Details for manufacturing groups in N.T. and A.C.T. are not available. (g) Excludes rural industry and private domestic service.

NOTE. For definitions and explanatory notes, see pages 2 to 7.
